Subject Liability

Mr. Foust I reviewed your statement confirming that you are not aware of asbestos and PCBs on Vessel Caroline. Per our telecon, you have been advised of the potential legal liability if these hazardous items are on the vessel.

Thanks

Subject Vessel Caroline

Shelia, I have reviewed the information you sent me regarding the possible presence of abestos and PCB's on the vessel. I'm an not aware of any of those materials. None of the original hydraulics, motors, switches, etc are present. The vessel was manufactured in 1979 and all of the items listed as possible sources of those items have been replaced. Please call me if you have any further questions. Thank you Linn

Subject Hazardous Surveys

Kim,

Even though your report of the vessel you reported to GSA on GSAXcess.gov (159JEA90960004) indicate that asbestos is not present, I also need to know if PCBs are on it. I will need something in writing about both due to potential legal liability if these hazardous items are on the vessel.

Thanks
